Career Objective

As a Computer Science and Engineering student with experience in C, C++, Python, and DSA, I aim to leverage my skills in programming, web development, and database management to build efficient software solutions. Passionate about solving real-world problems through technology, I seek a role that fosters continuous learning and growth.

Education

Amrita Vishwa Vidyapeetham

Apr 2023 – May 2027

Bachelor of Technology in Computer Science Engineering

- GPA: 7.88/10.0
- **Coursework:** DSA, DAA, Operating Systems, DBMS

Technical Skills

Languages: C++, Python, HTML, CSS, JS, SQL, PL/SQL

Tools & Technologies: MySQL, SQL, PL/SQL, Git

Projects

Brain Tumor Detection – Hybrid Quantum-Classical Model

Nov 2025

- Developed a hybrid CNN + Quantum Neural Network (PyTorch, PennyLane) achieving **98.84%** accuracy on 4 MRI tumor classes.
- Used EfficientNet-Bo and a 4-qubit variational quantum circuit; implemented mixed-precision training, label smoothing, ONNX export, and class balancing.
- Built a Flask app with drag-and-drop uploads, real-time inference, and Grad-CAM visualizations for explainability.

CampusGaurd – HTML, CSS, JavaScript, PHP, MySQL, XAMPP

Apr 2025

- Implemented a QR-based entry/exit logging system, reducing manual errors by 80% and enabling real-time student movement tracking.
- Designed Greedy Algorithm-based interval scheduling for automated attendance validation aligned with class timings.
- Optimized record retrieval using hashing + efficient search logic, improving lookup speed and ensuring fast verification during peak traffic.

Personal Finance Tracker – MySQL, C, HTML, XAMPP

Feb 2024

- Developed a finance management tool to track income, expenses, budgets, and savings with a clean web interface.
- Implemented the core financial computation logic in C, enabling high-performance calculations and fast response times.
- Utilized MySQL for persistent storage, enabling structured transaction history, secure data retrieval, and consistent recordkeeping.

Papers/Research Papers

◦ Innovative Architectures for UAVs and Mobile Robotics and Their OS

Investigated OS-level architectural design considerations for UAV and mobile robotic systems.

Additional Skills & Certifications

- Analytical thinking, problem-solving, time management, team collaboration, quick learner.
- **Certification:** TCS Young Professional – Soft Skills
